# Bring the past to life!

Project Title	Bring the past to life!
Project Summary	Take a virtual walk through the past while bringing our collection of projector slides and photos new life by digitizing and organizing them.
Country	United States

Project Description

Old collections of projector slides and photos have been long lost and aren't in usable formats. This is where we need your skills! You will be working with the Heritage Program Manager/Tribal Liaison of the Ozark-St. Francis National Forests as you look through our collections, digitizing and organizing the slides and photos into categories and usable formats for future interpretative uses.

Required Skills or Interests

Skill(s)

Data visualization

Additional Information

Pictures help tell the story of the work we do at the Forest Service and that includes preserving the past for future generations. As technology has increased through the years, it has left some important resources unusable. Your assistance with this project is most appreciated and will contribute a lasting legacy for future generations in the important work that the US Forest Service does.
